

Public Comment – Item 4.D.1 – Fleet Maintenance

It appears to the public that Sweetwater Authority does not understand the Mercury Report and how to interpret the numbers it contains.

It is recommended that Staff be required to provide answers to the original 10 questions submitted before the committee takes any further action regarding the Mercury Report.

I have drafted an alternate plan to be considered regarding Sweetwater Authority's maintenance of their vehicles. However, I can not completely present that plan and the rational for it within a 3 minute public comment time. I am prepared to present that plan in person to the committee after the Coronavirus "stay apart" is lifted.

Until I can present an alternate plan for the committee's consideration, I again recommend that the committee defer any Further action on this agenda item.

Submitted,

Mike Sampsel
