I would like my comment read under:	Board Action Item
Action Item Number	Action Agenda Loveland Boat Launch
Enter Your Comment	<p>With regards to the encouragement by the General Manager Carlos Quintero for this board to move forward with the draining of Loveland Reservoir:</p> <p>The purpose of draining the lake to dead pool levels is to accommodate changes in water storage policies that would destroy the recreation and conservation amenities established in the 1996 Land Swap and Loveland Reservoir Fishing Program relocation and easement, and easement which was specifically created to protect fishing on the shoreline at the</p>

east end of the lake.

The SWA can't fulfill these obligations with this boat launch alteration plan you are discussing tonight.

All board members and staff at this meeting are aware or should be, that proceeding with this destructive course of action does not meet your good faith and fair dealing requirements established in the land swap transaction.

Please think about that! Your organization, as directed by this board, has Fair dealing requirements with regard to the public stakeholders, lake users, and others.

Stopping until this good faith and fair dealing are in effect through an appropriately vetted process is the right thing to do.

Leaving it until the CEQA process which the public will definitely weigh in on, is not appropriate and could be a waste of time and money for your ratepayers. Not one step should go forward without breaching the topic of resolution of these good faiths and fairly dealing obligations.

What will it take for the SWA to act in a way that deserves respect, cooperation, and public trust from our communities?
